The official Art Club of KITCOEK, Kolhapur

AURA: The Energy of Art

Establishment Year – 2012

About Club

AURA, the soul of artistic expression at KITCoEK, was born from a simple idea - to give students a space where creativity meets curiosity. More than just a club, AURA is a movement that celebrates the power of visual storytelling, design, and artistic innovation. With every brushstroke, poster, and installation, it brings life to the campus and a voice to the ideas that often go unspoken.

Throughout the year, AURA channels this energy into a series of inspiring events that spark both conversation and imagination. Whether it's challenging minds through conceptual design in Co-evolution, bringing tradition to life during the Ganesh Festival, reflecting inner thoughts in Darpan, or exploring the future of creativity in Kaladalan 2026, each initiative is a canvas of bold ideas and collaborative effort.

What sets AURA apart is its belief that art is not just decoration - it's a force. A force that can inspire change, question norms, and connect people. The club thrives on pushing boundaries by merging art with technology, sustainability, and innovation. It empowers students to not only create but to communicate, innovate, and lead.

Behind every vibrant backdrop and powerful visual is a team of passionate minds - planners, painters, thinkers, and dreamers - who make the magic happen. AURA doesn't just organize events; it curates experiences, creates meaning, and leaves behind impressions that last well beyond the final exhibit.

Design Workshop: Figma and Canva

Date: 21 August 2025

Organised By:
AURA: The Energy of Art

Instructor's: Jayaraj Jadhav

Bhakti Mudgal

Shivam Dombe

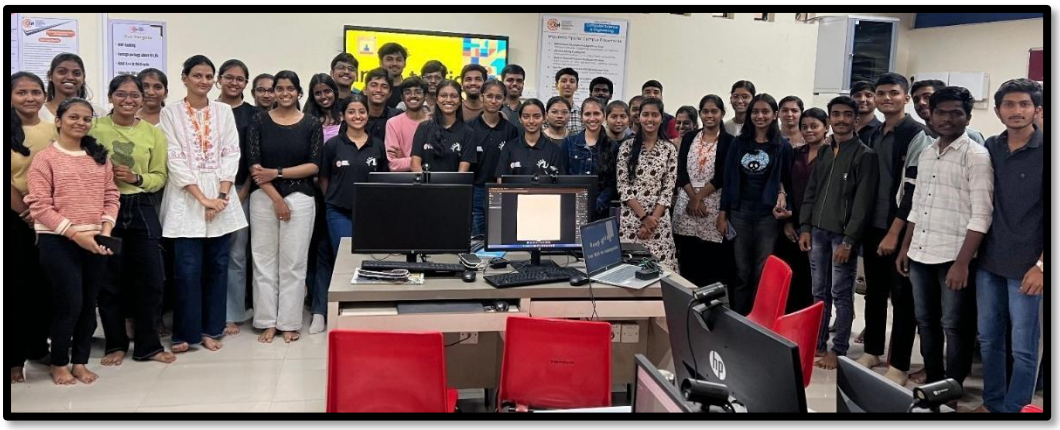

Description:

On **21st August 2025**, **AURA: The Energy of Art** organized an engaging **Design Workshop on Figma and Canva** to introduce students to modern graphic design tools and enhance their creative and digital design skills. The workshop aimed to provide participants with practical knowledge of designing visually appealing posters, presentations, social media creatives, and user interface layouts using two of the most popular design platforms.

The session began with an introduction to the fundamentals of graphic design, including color theory, typography, layout principles, and visual hierarchy. Participants were then introduced to the features and applications of **Canva** for quick and effective graphic design, followed by **Figma**, where they learned the basics of UI/UX design, wireframing, prototyping, and collaborative designing. The workshop included live demonstrations, hands-on activities, and interactive design exercises, allowing participants to create their own posters, social media posts. The trainers also shared valuable design tips, shortcuts, and best practices to help students improve their creativity and workflow. Students actively participated throughout the workshop by asking questions, experimenting with design tools, and showcasing their creative outputs. The interactive learning environment encouraged collaboration, innovation, and confidence in using digital design software.

The **Design Workshop: Figma and Canva** successfully equipped students with essential design skills relevant to academics, technical projects, competitions, and professional development. The event was well received by participants and marked another successful initiative by **AURA: The Energy of Art** in promoting creativity, innovation, and digital learning among students.

Ganesh Festival

Date: 26 August to 28 August 2025

Ganesh Agaman: 26 August 2025
Ganesh Visarjan: 28 August 2025

Organised By:

AURA: The Energy of Art, with the assistance of all other student clubs

Guided By: Dr. Jitendra Bhat

Prof. Pramod Jadhav

Prof. Vijay Rokade

Description:

In coordination with all other student clubs, **AURA: The Energy of Art** enthusiastically organized the **Ganesh Festival 2025** on the college campus from **26th August to 28th August 2025**. The festival was celebrated with great devotion, enthusiasm, unity, and cultural spirit, bringing together students, faculty members, and staff.

The celebration began with the grand **Ganesh Agaman on 26th August 2025**. Lord Ganesha was welcomed with an energetic **Dhol Pathak procession**, filling the campus with joy and festive spirit. A beautifully crafted Ganesh Murti was installed amidst vibrant decorations, colorful flowers, creative artwork, and traditional elements, reflecting the creativity, teamwork, and dedication of all student clubs.

Throughout the festival, students and faculty members actively participated in daily Aarti and devotional activities. A soulful **Maha Aarti** and **Bhajan program** created a spiritually uplifting atmosphere filled with devotion, music, and enthusiasm. The program was followed by the distribution of **Prasad** to all attendees.

The celebration concluded with **Ganesh Visarjan on 28th August 2025**, where Lord Ganesha was given a heartfelt farewell with devotion, music, and prayers for happiness, prosperity, wisdom, and success.

The **Ganesh Festival 2025** successfully celebrated tradition, faith, creativity, teamwork, and unity. The collective efforts of AURA and all other student clubs made the festival a joyful and memorable experience for the entire college community.

Kaladalan 2026

(Yugantara: The Human Shift)

Date: 21 February to 22 February 2026

Organised By:
AURA: The Energy of Art

Name of Expert/Judge: Mr. Sajit Hudli
(Chairman, KIT)
Mr. Dipak Chougule
(Secretary, KIT)
Dr. Mohan Vanarotti
(Director, KIT's College of Engineering Kolhapur (Empowered Autonomous))

Description:

KALADALAN 2026 – The Flagship Art Exhibition by AURA

KALADALAN 2026, the flagship art exhibition organized by **AURA: The Energy of Art**, the Art Club of KIT's College of Engineering, Kolhapur, was held from **21st February to 22nd February 2026**. Spanning two days, the exhibition brought together creativity, imagination, artistic expression, and social awareness under the thought-provoking theme: **"Yugantara: The Human Shift."**

The word *Yugantara* represents a transition from one era to another—a significant shift in human values, lifestyles, relationships, and connection with the world. Through various artworks, installations, and creative models, the exhibition portrayed the journey of humanity across four symbolic ages: **The Age of Balance, The Age of Growth, The Age of Competition, and The Age of Disconnection.**

The exhibition was inaugurated with a ribbon-cutting ceremony by the esteemed guests, marking the beginning of a meaningful and immersive artistic journey. Each artwork encouraged visitors to reflect on how human civilization has evolved—from living peacefully in harmony with nature to experiencing rapid growth, intense competition, technological advancement, and increasing emotional and social disconnection.

This year's exhibition focused on presenting the transformation of human life through creative storytelling. Paintings, sketches, artistic installations, handcrafted models, sculptures, and innovative displays were used to illustrate the changing relationship between humans, nature, society, technology, and emotions.

The Four Ages of Yugantara:

- **The Age of Balance:**

This stage represented a time when humans lived peacefully in harmony with nature. Life was simple, relationships were meaningful, and people respected natural resources. The artworks reflected unity, balance, cultural values, and a deep connection between humanity and the environment.

- **The Age of Growth:**

This stage portrayed the development of human civilization through knowledge, education, innovation, industrialization, and technological advancement. It represented progress, creativity, opportunities, and humanity's continuous desire to learn, explore, and build a better future.

- **The Age of Competition:**

This stage highlighted the growing race for success, wealth, recognition, power, and achievement. The artworks depicted the increasing pressure of modern life, where competition often influences personal choices, relationships, ambitions, and individual identity.

- **The Age of Disconnection:**

The final stage reflected the consequences of rapid technological advancement and changing lifestyles. Although people are digitally connected more than ever, emotional distance, loneliness, environmental neglect, and reduced human interaction have become growing concerns. The artworks encouraged visitors to reconnect with nature, society, relationships, and their inner selves.

Highlights of the Exhibition Included:

- Creative installations representing humanity's transition through the four ages—Balance, Growth, Competition, and Disconnection.
- Artistic models portraying the evolution of human civilization, society, technology, and changing lifestyles.
- Thought-provoking artworks highlighting the impact of rapid technological development on human emotions and relationships.
- Creative displays representing the growing distance between humans and nature in the modern world.
- Paintings and sketches depicting cultural values, human emotions, social transformation, environmental awareness, and the changing identity of humanity.
- Innovative models and installations demonstrating the contrast between traditional life and the technology-driven modern era.
- A diverse collection of paintings, sketches, sculptures, handcrafted artworks, and creative exhibits showcasing the artistic talent and imagination of AURA members.

At the heart of the exhibition stood the central theme, **"Yugantara: The Human Shift,"** representing humanity's journey through changing eras. The transition from balance to growth, from growth to competition, and ultimately toward disconnection encouraged visitors to reflect on an important question: **As humanity continues to progress, are we becoming more connected or gradually losing our connection with nature, society, and ourselves?**

KALADALAN 2026 was more than an art exhibition—it was a journey through time and a reflection of human transformation. Through creativity and artistic expression, the exhibition conveyed a powerful message about balancing progress with humanity, technology with emotions, and development with environmental responsibility.

The event received enthusiastic participation and appreciation from students, faculty members, guests, and visitors. KALADALAN 2026 marked another successful chapter in AURA's journey of artistic excellence, creativity, awareness, and meaningful social expression.

Darpan: The Reflection of Art

Date: 10 May 2026

Organised By: AURA: The Energy of Art

Number of Participants: 100+ participants

Name of Expert/Judge: Hon. Chetan Dodwad (Photographer)

Description:

Darpan 2026: The Reflection of Art was a vibrant on-the-spot art competition organized by AURA: The Energy of Art, the Art Club of KIT's College of Engineering, Kolhapur. The event provided a creative platform for students to showcase their imagination, originality, and artistic talent through four categories: Sketching & Painting, Mandala & Doodling, Digital Art, and Videography & Editing.

All artworks and videos were created and edited live during the competition, highlighting the participants' creativity, spontaneity, technical skills, and effective time management. The event was judged by Hon. Chetan Dodwad, Professional Photographer, who evaluated the participants' work and provided valuable feedback. He also shared inspiring experiences and insights from his journey in photography and art, motivating students to explore their creative potential.

The event successfully brought together traditional art, digital creativity, and visual storytelling while promoting artistic expression, innovation, and enthusiasm within the college community.

Highlights:

- Participants competed enthusiastically across four creative categories.
- All artworks and videos were created and edited live on the spot.
- Hon. Chetan Dodwad provided valuable feedback and shared inspiring insights from his artistic journey.
- The event successfully celebrated creativity, imagination, and artistic talent.
