KOLHAPUR INSTITUTE OF TECHNOLOGY'S COLLEGE OF ENGINEERING KOLHAPUR (EMPOWERED AUTONOMOUS)

AICTE's

STUDENT INDUCTION PROGRAM

FOR

F.Y. B.Tech 2025-26

Report on Induction Program for F.Y. B.Tech Students -2025-26

The First Year Student Induction Program was organized at Kolhapur Institute of Technology's, College Of Engineering Kolhapur (Empowered Autonomus) from 28, 29, 30 August 2025 (Part I) to 3 & 4 September 2025 (Part II) with the primary goal of welcoming and orienting incoming new students with the academic environment, campus facilities, rules, rules, and culture of the institution. The major aim behind conducting the induction program was to make the students aware of the academic culture, get acquainted with the new atmosphere and introduce the vision and missions of the institute. The program consisted of a 5-day's orientation, with a diverse range of activities including academic sessions, campus tours, student services presentations, workshops, and social events.

Introduction

As per the schedule given by AICTE for induction program, we the institute of Kolhapur Institute of Technology's College of Engineering Kolhapur (Empowered Autonomous), scheduled all the activities and conducted successfully throughout different sessions such as morning, afternoon and evening every day, the Induction Program was held from 28, 29, 30 August 2025 (Part I) to 3 & 4 September 2025 (Part II). The time table for all the activities had prepared properly and according to the prepared time-table all the activities were conducted smoothly. Following is the list of all program cum activities conducted during induction program.

1) Inauguration Function

2) Information about Institute by Hon. Director.

3) Learning Skills in carrier & technical education

4) Beyond the Classroom: Discover Your Student Clubs.

5) Statutory Mechanisms for Safeguarding Student Interests in Engineering Education

6) Campus Compass: Finding Your Way with Mentors

7) Communication Your gateway to success

8) Mental Health Awareness

9) From first test to final year: Navigating the evaluation system

10) Financial Literacy

11) Creative art

12) Beyond the Degree: Navigating Placements, Higher Studies & Entrepreneurship

13) KIT- A hub for young innovators & Engineers

14) Expectations of Industry from fresher

15) Redefining Success

16) Scholarship Awareness

17) Wellness through Sahajyoga Meditation

18) Environmental Awareness

19) Gender Equality

20) Startup Eco-system

The different sessions are briefly summarized below:

1) Inauguration

We started with a warm welcome from the faculty, all the Dean's, HOD's and staff. An official welcome speech given by Dean Student Activity Dr. Jitendra Bhat who highlighted the Institute's values and commitment to student success. Chief Guest Director Dr. Mohan Vanarotti briefed the information about Institute, encouraged and motivated students to be active and to involve sportively in all the activities at KITCoEK. Dr. Asif Qureshi head of BSH briefed about First Year. The vote of thanks and program details briefed by Miss Shubhada Sawakhande.

Glimpses of F.Y.B.Tech Student Induction Program Inauguration function

Felicitation of Hon. Director sir by Registrar sir

Address by Hon. Director sir to First year students

Welcome speech by Dean Student Activity to First year students

Address by Head BSH to First year students

2) Information about Institute:

On behalf of KIT's college of Engineering Director Dr. Mohan Vanarotti Sir Welcome and introduce new students to the institution. He Provide essential information about academic and campus life. He highlighted all the achievements of the college as an institution and briefed on the journey of success of how it became renowned in the region. One of our major focuses is the progression of our students. We firmly believe in providing a holistic education that not only equips you with knowledge but also helps you develop essential life skills. To achieve this, we have established various internal committees and cells dedicated to different aspects of your growth. As you embark on your educational journey here, I encourage you to take full advantage of the facilities we provide. Whether it's our state-of-the-art labs, well-stocked library, or various clubs and organizations, these resources are here to help you grow and excel. In closing speech he said, remember this: you are not just student you are KITians. Embrace the opportunities, harness the knowledge, and make the most of your time here. Be the best version of yourself, for it's your journey, your future, and your legacy that we are building together.

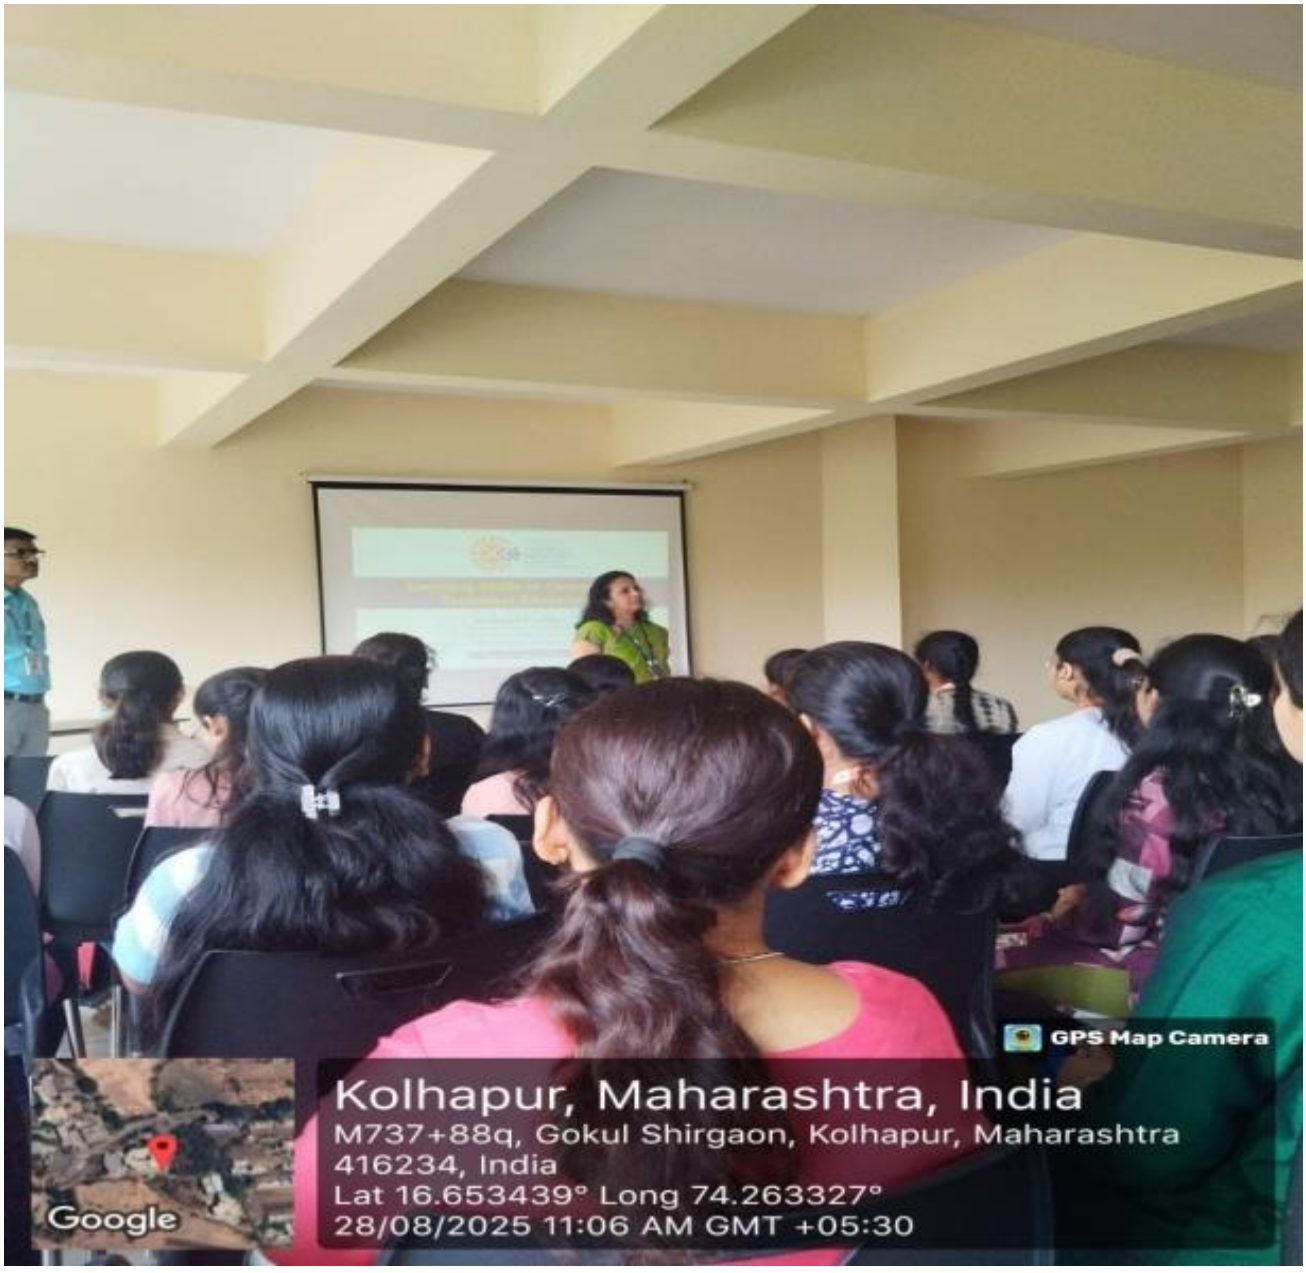

Director Dr. Mohan Vanarotti while guiding students.

3) Learning Skills in career & technical education: Dr. Akshay Thorvat, Dr. P. P. Powar, Dr. D. K. Jadhav

First session was conducted by Dr. Akshay Thorvat (Dean Academics), Dr. P. P. Powar and Dr. D. K. Jadhav introduced the students to the various aspects of the curriculum and the academic requirements and options available for various courses. Also, he introduced the best practices which have been implemented at KIT for smooth and hustle free academic conduction. Along with the academic activities he introduced the students to the disciplinary actions which are taken in case of misbehave or misconduct in the premises during college hours. The four years curriculum was explained to students in detail. Highlighted the importance of each subject. He briefed about academic rules and regulations through a presentation. The students listened to the session very eagerly and interestingly.

Learning Skills in career & technical education by Dr. P. P. Powar sir

Learning Skills in career & technical education by Dr. D. K. Jadhav Madam

4) Beyond the Classroom: Discover Your Student Clubs.

During this session the Dean Student Activity Dr. Jitendra S. Bhat briefed about aims and objectives of student clubs. He also introduced the students about various co-curricular and extra-curricular activities which are conducted for the holistic and overall personality

development of the students during the academic years. He introduced various students club and their faculty coordinators. He also briefed about importance in defence sector and recruitment. He also showed some videos of Pioneer opening. He acquainted the students with the active clubs and the nature of activities that are conducted under various clubs. Maverics, WWW, Orator, NSS, NCC, Robotics, Rotract and many more, total 27 clubs are active in the college. He introduced the student the major objectives of each and every activity conducted under each club. In the first session Apart from curricular activities other co-curricular activities are also being conducted in the college since the establishment of the college. Only academic performance is not enough for overall development of the students. He briefed how the other co-curricular activities are helpful in the development of the students. He also, briefed about the successful students through other co-curricular activities. All the students attending the lecture asked the doubts related to the activities. The said session remained fruitful for all the students.

Information of Students Club given by Dr. Jitendra Bhat Sir

5) Statutory Mechanisms for Safeguarding Student Interests in Engineering Education

Dr. Kulkarni briefed about statutory committee. She also highlighted the anti ragging committee. Briefed about Grievance redressed committee. Also focused on ICC & Equal opportunity cell. As future engineers, students must not only receive quality education but also be protected in a learning environment that promotes fairness, transparency, and growth. Engineering education is the foundation of technological advancement, and to build strong professionals, the system must be robust and student centric. Statutory mechanisms serve as the backbone to ensure this by providing legal and institutional frameworks that protect student rights and promote academic integrity. In conclusion, statutory mechanisms are indispensable in safeguarding student interests in engineering education. They ensure not only the quality of education but also uphold the rights, dignity, and well-being of every student. As future engineers, understanding and advocating for these protections helps us foster a culture of fairness, respect, and excellence.

Dr. Deepti Kulkarni shared information about Safeguarding Student Interests in Engineering Education

6) Campus Compass: Finding Your Way with Mentors

The third session titled *"Finding Your Way with Mentors"* under Campus Compass was conducted by Mrs. Jahida Khan. Explained the importance of mentorship in academic and personal growth. She highlighted how mentors can guide students in navigating campus life, academics, and career paths. Stressed on building a healthy mentor-mentee relationship for continuous learning. She also shared real-life examples and experiences of successful mentoring, importance of mentorship in decision-making and career development. She also made realization that mentorship is a long-term support system for both academics and life skills.

Students were introduced to the concept of seeking guidance from faculty and senior peers. The session included discussions and Q&A, making it engaging and informative.

The session was insightful and motivating, giving students a clear understanding of the role of mentors in shaping their journey. Students felt more connected to the campus environment and confident about seeking guidance.

Mrs. Jahida Khan Disseminating information to students

7) Communication Your gateway to success

The session titled *"Your Gateway to Success"* was conducted by Miss. Kshitija Tashi. Emphasis on the importance of effective communication skills in personal and professional life. Also explained how communication is a gateway to confidence, career growth, and success. She Shared practical tips for verbal and non-verbal communication improvement. Stressed on the role of active listening and positive body language. Highlighted how communication helps in teamwork, leadership, and problem-solving. Importance of being a good listener as well as a good speaker. Communication as a tool for building confidence and overcoming stage fear. Developing communication skills as a step towards employability and success

Students were engaged through examples, anecdotes, and interactive discussions. Participation encouraged understanding the significance of clear expression. The session was highly motivational and informative. Students expressed that it gave them a new perspective on communication as a life skill.

Miss. Kshitija Tashi Conveying information to students

8) Mental Health Awareness

The second session of the day was on *"Mental Health Awareness"* conducted by Mrs. Supriya Patil. Focused on the importance of mental well-being for students in academic and personal life. She Discussed common challenges such as stress, anxiety, and peer pressure faced by students. Emphasized the role of self-care, time management, and emotional balance. She also shared strategies to build resilience, positive thinking, and healthy coping mechanisms.

The session included awareness discussions and encouraged students to share their views. Students were guided on how to identify mental health concerns and seek help when needed. Understanding that mental health is equally important as physical health. Highlighted importance of seeking support from friends, family, or professionals. Developing a habit of mindfulness, relaxation techniques, and work-life balance.

The session was highly insightful and impactful, encouraging students to prioritize their mental well-being. It created awareness and sensitivity about maintaining a healthy mind for overall success in life.

Mrs. Supriya Patil passing on information about Mental Health Awareness

9) From first test to final year: Navigating the evaluation system

This session was hosted by Dr. Manoj Yadav, who addressed the students on the evaluation system followed at the college. He Introduced the nature of examinations conducted by the institute right from the beginning of the semester. Dr. Yadav explained the difference between university exams and in ternal exams conducted by autonomous institutions. He elaborated on the components of exams including in semester exam (ISE), Mid Semester Exam (MSE) and End Semister Exam (ESE) for both theory and practical subjects.

Dr. Manoj Yadav Providing exam information to students

10) Financial Literacy

The second session of the induction program focused on financial literacy. Dr. Sachin Dhanani highlighted the nine principles of financial management and explained basic economic concepts relevant to students. He emphasized the importance of money management, daily expense planning, saving, and healthy financial habits.

The session was interactive, with discussions about students' spending patterns and lifestyle choices. Practical examples were used to clarify doubts, making the session informative and useful for students' academic and personal lives.

Awareness about Finance by Mr. Sachin Danani

11) Creative art:

On the second day of Student induction program, the first session was conducted by Mr. Sanjay Haldikar. He is well known art director, producer and actor who have been conduction numerous workshops for youth as well as school students across India.

During his session he focused primarily on personality development. He highlighted the importance of nurturing and developing creativity as it plays a vital role in enhancing personality across different aspects of life.

The session was activity based, with exercises related to leadership skills, teamwork, communication skills, and thinking attitude. Students participated enthusiastically, making the session engage and impactful.

Practical session about Personality Development by Mr. Sanjay Haldikar

12) Beyond the Degree: Navigating Placements, Higher Studies & Entrepreneurship

An insightful session titled "Beyond the Degree: Navigating Placements, Higher Studies & Entrepreneurship" was conducted. The session was delivered by Ms. Nilofar Kazi, who shared her valuable knowledge and experiences with the freshers, guiding them on how to make the most of their engineering journey and prepare for diverse career paths. Emphasized the importance of exploring multiple career options beyond the engineering degree, including placements, higher education, and entrepreneurship. She explained how students should begin developing clarity about their interests early on, while also keeping their options flexible. Gave insights into the current industry requirements, the role of technical skills, soft skills, and internships in securing good placements. She motivated students to build strong fundamentals, participate in projects, and practice problem-solving to stand out in interviews. Briefed about opportunities in postgraduate studies, research, and specialized certifications in India and abroad. Highlighted the importance of preparing for competitive exams, exploring scholarships and building a strong academic record. Focused on entrepreneurship as a viable career path. Shared how innovation, risk-taking, and leadership skills can help students translate their ideas into startups and business ventures. Reinforced the idea of continuous learning, participation in clubs, hackathons, and realworld projects to enhance exposure. The

session proved to be highly interactive and motivational. The insights shared by Ms. Nilofar Kazi left the students inspired to think “beyond the degree” and shape their future with confidence.

Ms. Nilofar Kazi sharing information about Placements, Higher Studies & Entrepreneurship

13) KIT- A hub for young innovators & Engineers

Dr. Mohan Vanarotti, Director of KITCOEK, delivered a motivating and informative session for first-year engineering students as part of their induction program. Titled "A Hub for Young Innovators & Engineers," the session aimed to ignite curiosity and introduce students to the innovative culture fostered at KITCOEK. At the beginning of the session, Dr. Vanarotti warmly introduced the esteemed trustees of KITCOEK, acknowledging their vital role in the institution’s growth and vision. He shared their collective commitment to empowering students through quality education, research, and industry exposure. Beyond innovation, Dr. Vanarotti also emphasized the importance of discipline, responsibility, and respectful conduct on campus. He made students aware of the institute’s code of conduct, highlighting expectations around

punctuality, classroom behavior and mutual respect. He stressed that professionalism begins on day one and that discipline forms the foundation of a successful engineering career. The session concluded with an invitation for students to actively participate in the vibrant learning environment at KITCOEK — not only as learners but as future leaders, problem solvers.

Hon. Director sir addressing students about Engineering

13) Expectations of Industry from fresher

The speaker highlighted that companies seek not only academic excellence but also strong communication skills, problem-solving abilities, and adaptability. The importance of skill development, confidence, and consistent preparation to succeed in campus recruitment was also explained. Students were advised to focus on practical learning, teamwork, and continuous upskilling to meet industry standards. Key points included resume building, interview steps & techniques, and the value of internships in gaining practical exposure. Students were encouraged to balance academic performance with extracurricular activities to enhance their overall profile. The talk also includes placement history, previous collaborations, company approached and hired from on campus placement and CTC milestone achieved by KIT college of engineering, Kolhapur. The session highlighted the nuances and gaps between industry & academia. KIT as an institution has a focused approach for connecting industry demands through

strong academic foundation & skill-based learning for young engineers. The session truly helped the students to understand what the industry demands from freshers and how to achieve success in the career path.

What is the industry need from freshers, by Dr. Amit Sarkar

14) Redefining Success

Dr. Ameet Chate is widely recognized for his contributions in the field of education and training. His sessions are known for their practical insights, interactive approach, and ability to connect with young minds. Success is not limited to wealth, position, or materialistic achievements. True success lies in self-satisfaction, personal growth, contribution to society, and maintaining balance between personal and professional life. He gave some examples of well known personalities also. Embrace challenges as opportunities for growth. Importance of perseverance, continuous learning, and adaptability in a rapidly changing world. Integrity, discipline, and strong moral values form the foundation of long-term success. Real-life stories illustrated how ethical choices lead to sustainable achievements. Encouraged students to adopt a growth mindset. Focus on learning from failures and pursuing excellence rather than perfection. Self-belief, consistency, and time management are key drivers of success.

Goal setting, emotional intelligence, and communication skills are essential tools for personal and professional growth.

Real Meaning of success, by Mr. Ameet Chate

15) Wellness through Sahajyoga Meditation

Sahaja Yoga is a unique method of meditation. Unlike traditional forms of yoga, Sahaja Yoga focuses on spontaneous self-realization through the awakening of a subtle energy known as Kundalini**,** which lies dormant at the base of the spine. The meditation technique helps clear and balance the seven main chakras (energy centers). A state of inner silence where the mind is calm and free of unnecessary thoughts. Mental Wellness Promotes emotional balance and inner peace, reduces stress, anxiety, and depression, improves focus, memory, and clarity of thought, cultivates self-awareness and emotional intelligence.

Practical session about Meditation by Ritesh Dalal

16) Environmental Awareness

The talk was aimed at highlighting the urgent need to protect and preserve our natural surroundings. The speaker emphasized the alarming rise of pollution, deforestation, climate change, and the depletion of natural resources, stressing how human activities directly impact ecological balance. The session focused on simple yet effective steps that individuals can adopt, such as reducing plastic use, conserving water and energy, practicing waste segregation, and promoting afforestation. The importance of collective responsibility, sustainable lifestyle choices, and environmental education was strongly underlined. The main goal of environmental awareness was to foster a widespread understanding of the natural environment and the major issues affecting it. The lecture by renowned Environmental activist, Mr. Nitin Doiphode, was a deeply moving and inspiring call to action. As per his lecture, we have already crossed the environmental tipping point. An environmental tipping point, particularly in the context of climate change, is a critical threshold that, when crossed, leads to a significant and irreversible change in a natural system. But the central pillar of his talk was the belief that every individual has the power to save nature. Every individual matter. Every individual has a role to play. This was very informative session regarding mother nature, the student response was typically a mix of

inspiration, emotional connection, and a renewed sense of responsibility. As speaker shared his personal experience, students felt a more personal connection to environmental issues. The talk concluded with an inspiring message that safeguarding the environment is not just a duty but a necessity for ensuring the survival and well-being of future generations. The session was highly informative and motivated participants to adopt eco-friendly practices in daily life.

Awareness about environment by Mr. Nitin Doiphode

17) Gender Equality

Mr. Swati talked about gender equality. He explained very well about, male & female qualities. He also interacts with students & frees them to talk on social issues. According to him gender operates us. He described day-to-day activities

e.g. If she cries it's fine

If he cries, he's weak

He explained 'sensitivity' with this example. Suggested some movies like 'pink' to see & ask them to think about social issues. Provider, Protector, Procreator are three qualities of male

by gender role. He also talked about adjustment, Personal is Political. Asked the students whether today's society promotes gender inequality? Yes or No

Information about gender equality by Mr. Krishnath Swati

18) Startup Eco-system

As part of the induction program for first-year students, Mr. Sudhir Arali, CEO of KITCOEK Innovation and Research Foundation (IRF), delivered an insightful expert session focused on entrepreneurship, innovation, and startup ecosystems. He began by introducing the Incubation Centre at KITCOEK, highlighting its mission to nurture innovative ideas and support student-led startups. He inspired students to start looking for co-founders early, citing real-life success stories like Meesho, Ola, Elon Musk, and Mansukhbhai of Mitticool.

He explained the difference between conventional businesses and startups, the role of E-Cell, and the importance of creating a supportive ecosystem for innovation. Key topics included DPIIT recognition, Unicorn status, and state and central startup policies.

IRF, started in 2022, received ₹1.54 Cr from DST and is now a top performer among 58 incubators, uniquely funded by both MS and DST. It supports only tech-based startups, offering 24×7 mentorship, funding (₹2–10L seed, up to ₹10L commercial), and incubation.

He also announced Ideathon 2025 which will be open from 9th September 2025 with cash prizes, incubation for top 20 ideas. Overall, the session created excitement and confidence among students to pursue their ideas, solve real-world problems, and become future entrepreneurs.

Idea about Startup by Mr. Sudhir Arali

Conclusion:

As we come to the close of this **Student Induction Program**, students now feel more informed, confident, and inspired to begin their journey in this institution. Over the past few days, they have been introduced to the academic structure, campus facilities, faculty, and most importantly, the values and culture we uphold here. This program was not just about orientation, it was about laying the foundation for their personal, academic, and professional growth. They have learned about wellness, ethics, responsibility, teamwork, and self-discipline all essential qualities of a successful engineer and a responsible citizen.

They also learned that these coming years are not just for gaining knowledge, but for building character, resilience, and purpose**.** Use every opportunity wisely, ask questions, challenge yourself, and stay curious.
